PROFESSIONAL SUMMARY

Senior Software Engineer with 6 years of experience specializing in high-impact healthcare and fintech solutions. Expert in developing complex tools (PEM, MPEO, HSA) and AI-driven chatbots using AWS Bedrock and Python. Proven track record of excellence with 4 promotions and multiple prestigious awards for innovation and delivery within Fortune 500 global accounts.

TECHNICAL SKILLS

Languages: JavaScript (Node.js), Python, HTML5, CSS3, Bootstrap 5, jQuery.

AI/ML: AWS Bedrock (Claude Sonnet 3.5), RAG System, LangChain, Amazon Lex.

Cloud & Tools: AWS Lambda 2.0, S3, EventBridge, API Gateway, DynamoDB, SSO.

Data Analysis: NumPy, Pandas, Excel (openpyxl, XlsxWriter), Automated Dashboards.

Domain Expertise: US Healthcare (PEM, MPEO, HSA, MRA, FSA), OneTrust implementation.

PROFESSIONAL EXPERIENCE

Wipro | Software Engineer | August 2021 - Present

Healthcare Decision Tools: Developed and maintained critical PEM (Plan Enrollment Modeler) and MPEO modules for high-profile clients in the aerospace, financial services, and telecommunications industries.

AI Chatbot & RAG Integration: Engineered an intelligent chatbot using Python and AWS Bedrock; implemented a RAG (Retrieval-Augmented Generation) system with LangChain to provide contextual, data-driven responses.

Search Crawler Development: Built a custom search crawler tool with Node.js and AWS (Lambda, S3, EventBridge) to output structured data reports.

Large-Scale Data Operations: Managed a daily pipeline of 62,000+ data points; developed Python-based validation reports to identify historical trends and resolve data ambiguities.

Microsite & UI Design: Designed mobile-responsive microsites using Bootstrap 5, integrating front-end components with back-end APIs to suggest tailored healthcare plans.

SELECTED PROJECT PORTFOLIO (Anonymized)

Aerospace & Defense: Developed benefits enrollment tools for a leading global aerospace manufacturer.

Banking & Finance: Scaled fintech modules for top-tier US-based global investment banks.

Telecommunications: Architected consumer-facing microsites for a primary US telecom provider.
